Dijon

Lemon Meringue

Potato Chip

Salt Water Taffy

Sweet Basil

Peapod

Other:

Acetate

Baker's Twine

MISTI or other stamp positioning tool

Hello

by Keia Shipp-Smith

1. Cut a 4 1/4" x 11" piece of Salt Water Taffy cardstock. Fold in half for a cardbase
2. Cut a 4" x 5.25" panel of Sugar Cube cardstock.
3. Create a stencil using acetate paper by die cutting the Scribbles Cutting Plate.
4. Create the daisies:
 - Stamp Simply Stamped - Daisies using the following colors to create two small and one large flower:
Base: Potato Chip
Middle: Lemon Meringue
Top: Dijon
 - Stamp the stem cluster in Peapod ink.
 - Stamp 2 sets of leaves, layering Peapod and Sweet Basil inks.
 - Die-cut the flower, stems and leaves using the coordinating dies.
 - Optional: Using liquid adhesive, add Prills to the flower's centers.
 - Die-cut the Hello Script (2x) from Sugar Cube cardstock. Adhere together.
5. Using Salt Water Taffy ink and an ink blending tool, randomly add color to the Sugar Cube cardstock panel. Next, tape the Scribble Cutting Plate acetate stencil over the inked cardstock panel and randomly apply white texture paste.
6. Once the panel is dry, assemble and attach the daisy bouquet using a combination of tape and foam adhesive. Use blue baker's twine to create a bow and attach to the center of the bouquet.
7. Use low-tack adhesive to create a two-tone on the Hello piece by masking the top and applying Salt Water Taffy ink and then masking the inked bottom half and applying Potato Chip ink.
8. Attach the Hello Script and adhere the panel to the cardbase.
